### **Harmonising a common dataset for biobanking of rare gynaecological cancers**

**Dr Sharon O'Toole, Dr James Beirne, Dr Bridget Ellul, Prof Charles Savona-  
Ventura, Dr Miriam Azzopardi, Dr Rita Micallef, Prof Simon Herrington**

# Objective of the Virtual Mobility

---

To establish a harmonized common dataset of parameters for biobanking of rare gynaecological cancers that would facilitate the creation of a virtual biobank.

To establish within the COST Action group what partners are already biobanking and would already have in terms of this information or whether an amendment to any current existing protocols would be necessary in order to establish the ideal dataset for a virtual biobank for rare gynaecological cancer.

# Parameters of Interest

---

- **Collection of rare gynaecological tumours?**
- **How are they classified?**
- **What material is collected eg blood, tissue etc**
- **What clinical parameters are collected eg BMI, tumour markers etc**
- **What pathological details are collected eg tumour subtype, stage etc**
- **Are treatment details recorded?**
- **Are patients followed up?**
- **How long are samples stored?**
- **Are patients consented for sharing of samples and data?**
